\* lead species for a group of weeds

\*\* Note that mother-of-thousands (*Bryophyllum daigremontianum*) and hybrid mother-of-millions (*B. x houghtonii*) were nominated alongside common mother-of-millions (*B. delagoense*) but were not accepted as only common mother-of-millions (*B. delagoense*) had been submitted at the EOI stage. Nominated species were not accepted where there was no approved EOI.

\*\*\* Note that European olive (*Olea europaea* subsp. *europaea*) and African olive (*O. europaea* subsp. *cuspidata*) were nominated, but olive (*O. europaea*) will be assessed as a single species during the detailed assessment, rather than at the subspecies level.
